

Series  
**S100**

**Ingenious Design for Easy Installation and Simple Operation.**

Pulsarlube **S**

### Features & Advantages

#### Innovative Design

The upward piston movement dramatically reduces grease hardening, the chronic issue of conventional spring type lubricators

#### More Reliable Lubrication

More reliable than other conventional spring type lubricators by minimizing the problem of oil separation

#### Cost Savings

Prevent plant downtime and save on manpower consumption for manual lubrication

#### User Friendly

- ▶ Available pre-filled and can be installed right out of the box
- ▶ Grease dispensing rate can be easily adjusted by using a control knob
- ▶ Refillable and reusable

### Typical Industries and Applications

#### The following equipment will benefit from using the Pulsarlube S

- Ball, roller bearings
- Shield bearings
- Bronze, oilite or open bearings
- Applications where a bearing flush is necessary

### Overview

### Product Specifications

#### Grease Pouch Capacity

100ml (refillable)

#### Operating Method

Spring

#### Operating Pressure

N/A

#### Operating Temperature

-23°C ~ 121°C (-9°F ~ 250°F)

#### Dispensing Periods

5 Dial Settings

#### Single Point Remote Installation

N/A

#### Multi-Point Installation

N/A
